ESP CUSTOM SHOP

YOUR DREAM, YOUR REALITY

The ESP Guitar Company believes that the process of creating a personalized guitar should be an easy one. We understand that players' needs are different, and this should be represented by the shapes, materials, electronics and finishes available from the Custom Shop. These options allow you to take your wildest ideas and turn them into reality, along with the help of the world's most respected and experienced luthiers and graphic artists. You can start with any original ESP shape, or come up with a brand new idea of your own to start the creative process.

Your very own customized guitar or bass can have any design, any combination you can imagine; unique finishes, graphics, inlays and more... Your dream of owning a one-of-a-kind instrument can now become a reality.

To get started visit www.espguitars.com, download the custom order form and submit it to ESP for a suggested retail price quote.

Iron Cross

Available in limited quantities during 2009 only, the ESP James Hetfield Signature Iron Cross is currently featured on Metallica's Death Magnetic world tour. Painstaking effort has gone into recreating every nuance of James' original guitar, while adding some new characteristics to make it a truly unique signature ESP.

OUIJA

Precisely 10 years after the final Ouija guitar left ESP's factory, ESP and Kirk Hammett have agreed to reissue this rare and highly sought after instrument on a limited production basis for 2009 only. Kirk continues to play his original Ouija on stage night after night, but production was halted in 1999 after only a handful were made available to the public. The new Ouija design remains faithful to the original with a White Ouija added to the series. Additional upgrades on the ESP Ouija include mirror inlays and an ebony fingerboard.

When your style defines an entire genre of music, you've done something special. Along with his band Helmet, Page Hamilton has been the unsung hero of alternative metal, influencing a generation of players who want to break out of the norm and find their own voice. Page has enlisted many instruments to help him create his unique sound, but for nearly two decades, one guitar has been his go-to machine for creativity and performance. The ESP Guitar Company is proud to reissue the Page Hamilton MG, a return to Page's most treasured guitar that's been recreated with the highest detail imaginable.

CLOCKWORK ZOMBIE

British Born Dark Artist Sam Shearon A.K.A "Mister Sam" has brought another groundbreaking, yet macabre new Graphic series called "Clockwork Zombie" to the LTD family. A graduate from Leeds of London, Mister Sam specializes in imagery of "Dark Art". The British press has described his work as grotesque, gruesome, and surreal. These guitars may have a dark and sinister look, but play and sound like the well known instruments that The ESP Guitar Company is famous for. These are a limited series sure to be enjoyed by the collector, and the avid player. For more info on Mister Sam, visit www.samshearon.com

METAL MULISHA

The ESP Guitar Company has created a special limited edition guitar graphic along with Brian Deegan and his extreme motorsports team Metal Mulisha. Deegan's crew of well-known heart stopping, death defying riders has been awarded more gold medals combined than any other rider or team. The custom limited edition guitar offers the team's logo on top of a costume spider web, which can also be seen on Deegan's/Metal Mulisha custom graphic helmet. The message here is clear: work hard, rock harder. For both sports and music, nothing could be more true. For more info on Brian Deegan and Metal Mulisha, visit www.metalmulisha.com

AVATAR / OUTLAW

For many years, the ESP Guitar Company and Chris Compston have collaborated on amazing, one-of-a-kind, hand-painted original guitars and basses. In our catalogs and at trade shows around the world, you've seen the work of Chris's masterful custom airbrushed graphics. His art encompasses many styles, but the new "Avatar" and "Outlaw" limited edition guitars are influenced by both anime and western graphic design. For more info on Chris Compston, visit www.MySpace.com/paintfastdieyoung

SPECIAL FEATURES & CONTROLS

EARVANA COMPENSATED NUT

ESP was the first major guitar manufacturer to feature the Earvana compensated nut on some of its most popular models. By compensating each string's length at the nut (similar to how a bridge saddle is compensated for intonation) you will notice much more accurate intonation across the fretboard, especially towards the open chording area, where this problem is most common.

GOTOH MAGNUM LOCK TUNERS

ESP proudly features Gotoh locking tuners on many new and existing ESP Standard Series instruments. Gotoh parts have long been the choice for many ESP instruments over the years. Gotoh's unique design automatically locks the string to the shaft while winding the tuning key (tuning to pitch).

STRING-THRU BASS BRIDGE

A few of our bridges allow the strings to be strung through the body or from the top like a traditional bridge. Stringing through the body adds more string length, which increases string tension. This comes in very handy when using lower tunings and/or you need to "beef up" the string tension but don't want to increase the size of the strings.

ESP LOCKING TUNERS

In 2008 we introduced our own locking tuners on many new and existing LTD Signature & Deluxe series instruments. Ease of use and elegant design were our key goals in designing these keys. Our tuning keys eliminate the need for wraps on the tuner shaft to improve tuning stability, reduce string slippage and simplify the restringing process.

SPERZEL LOCKING TUNERS

We have been using these fine tuners on our instruments for many years. Always requested by professional artists, these tuners are a must-have for the demanding musician. The key to their design is eliminating wraps around the string post, which can cause string slippage and tuning problems. Simply loosen the thumbwheel located on the back, feed the string through the post, lock the thumbwheel tight, cut off the remaining string, tune up and you're finished – better tuning stability and no more restringing nightmares.

SET-THRU NECK JOINT

Our innovative neck construction technique gives you the look and feel of a neck-thru-body design while maintaining the warmth and wood tone combinations of a set-neck instrument. Access to the upper frets is not a problem. And gone is that old traditional "bulky" set-neck heel.

TONEPROS LOCKING BRIDGE SYSTEM

We are proud to feature Tonepros bridge systems on many of our fine instruments. A simple, yet innovative improvement to the standard tune-o-matic bridge allows both the bridge and tailpiece to be locked down to the posts using 2 small set screws located on either end of the bridge and tailpiece. The result is increased sustain, exacting intonation perfection, and better playability & tuning – thanks to better bridge stability.

TWO-WAY ADJUSTING TRUSS ROD

Most of our instruments are built using a 2-way adjusting truss rod. Unlike a traditional (single-adjusting) truss rod which is still commonly used on many other manufacturers' instruments, our truss rod is adjustable both clockwise and counter-clockwise. With a single-adjusting truss rod, once you loosen the nut all the way, that is it. You are left with no more adjustment – this can leave your instrument unplayable if the neck cannot be adjusted properly. By using a 2-way truss rod we have eliminated the possibility of that ever happening.
