Memo #0041

Rear Wheel Parts Update

All teams will be receiving the following updated parts from Crawford Composites:

- Rear drive pegs
- Rear wheel nut washer
- Rear Stub axle

Crawford Composites will have people available at Mid-Ohio to assist teams with the installation of these parts. The use of the new parts will be mandatory. In addition, Crawford Composites will be checking all wheels previously delivered for drive pin concentricity and location. Those wheels found out of specification will be replaced.

Roll Hoop Towing Strap Modification

Crawford Composites will, at Mid-Ohio, perform a modification to the engine cover and air inlet box to allow the use of a towing strap without the removal of either the engine cover or air inlet box.
